23. (New) The telecommunication system according to claim 1, wherein said access control server maintains and updates a subscriber packet service subscription profile and actual packet session characteristics.

- 24. (New) The telecommunication system according to claim 1, wherein said access control server is responsible for bearer control and mobility management associated with packet services.
- 25. (New) The telecommunication system according to claim 2, wherein said mobile services switching center maintains control and handling procedures for said circuit-switched communications.

 \overline{c}

26. (New) The telecommunication system according to claim 60 wherein said telecommunications system includes a code division multiple access wireless telecommunications network.

REMARKS

By this preliminary amendment, the specification has been amended to correct a typographical error. Additionally, omissions in Figs. 2 and 8 have been corrected. Claims 12-26 have been added. Claims 1-26 are pending. Support for new claims 12-26 may be found throughout the Specification as filed. Applicant respectfully submits that no new matter has been introduced by these amendments.
